Summary

Hands-on problem solver with experience in mechanical work, system troubleshooting, and fast-paced environments. Background in electrical systems and real-world repair work, including automotive and physical labor roles. Reliable, detail-oriented, and quick to learn new tools and systems.

Skills

- **Technical:** Mechanical troubleshooting, basic electrical systems, hand & power tools, automotive repair, preventative maintenance
- **Workplace:** Teamwork, communication, time management, safety compliance, fast-paced environments

Experience

Undergraduate Researcher
May 2024 – Present

- Built, tested, and troubleshot electronic and embedded systems
- Diagnosed system issues and implemented fixes to improve performance
- Worked with hardware and software integration in real-world environments
- Managed projects independently while meeting strict deadlines

ASPIRE Research Assistant
May 2023 – April 2024

- Tested and debugged electrical and hardware systems
- Assembled components and worked with detailed technical setups
- Followed precise procedures and maintained organized workspaces
- Identified and resolved system issues through structured troubleshooting

Asphalt Laborer
May 2022 – August 2022

- Performed physically demanding outdoor work using tools and heavy equipment
- Maintained job site safety and followed proper procedures
- Worked as part of a team to complete projects efficiently and on schedule

Warehouse Worker
May 2021 – August 2021

- Operated in a fast-paced environment handling inventory and materials
- Used equipment and tools to move and organize products
- Maintained clean and safe working conditions

Restaurant Waiter
May 2019 – August 2021

- Demonstrated strong work ethic in high-pressure environments
- Communicated effectively with team members to ensure smooth operations
- Handled customer issues quickly and professionally

Education

Utah State University
Bachelor’s & Master’s in Electrical Engineering
