Nathan Walker

385-775-6664 **nate.walker.timp@gmail.com**

Education

Utah State University – Logan Utah May 2025

- B.S. Electrical Engineering
  - Dean's list 4 semesters
  - 4.0 GPA
  - Electrical & Computer engineering scholarship
  - Class of 1927 scholarship

Work Experience

ASPIRE Undergraduate Research Assistant May 2023 – Present

- Design and implement rigorous testing procedures for multiple printed circuit board (PCB) and diverse components, ensuring accurate and reliable results in research experiments
- Acquire valuable experience in navigating real-world design constraints and honing the ability to create innovative solutions
- Demonstrate expertise in assembling intricate PCBs and successfully managing large-scale projects

Engineering Projects

International Future Energy Challenge July 2023 – Present

- Leading the team's design for a D audio amplifier for high quality sound with high efficiency
- Analyze and compute losses in magnetic components of the amplifier, ensuring optimal efficiency and functionality
- Develop and assemble a PCB integrating a sophisticated microcontroller, enhancing the system's control and functionality

American Solar Challenge February 2023 – July 2023

- Strategically chose components, weighing pros and cons for optimal team performance
- Resolving challenges that came up to ensure project progress
- Mastered multi-system integration, enhancing efficiency through microcontroller expertise.

Useful software skills

Altium	Ansys magnetics	MATLAB
PLECS	Solid Edge Wiring and Harness	C/C++
